

Nothing escapes the power of a Dirt Devil®

Dynamic Series Dirt Devil® Central Vacuum Systems offer more power and quieter operation for your whole-house cleaning needs.

These systems deliver powerful cleaning performance using Cyclonic Filtration Technology® (CFT™), a unique dual filtration method that ensures maximum power every time you vacuum.

Dirt, dust and allergens are whisked away from your living area to the dirt bucket. Fine dust particles are trapped in a pleated filter, eliminating the recirculation of dust into your home. Your home stays fresher, cleaner... and healthier!

Maximum filtration effectiveness.
Quieter performance.

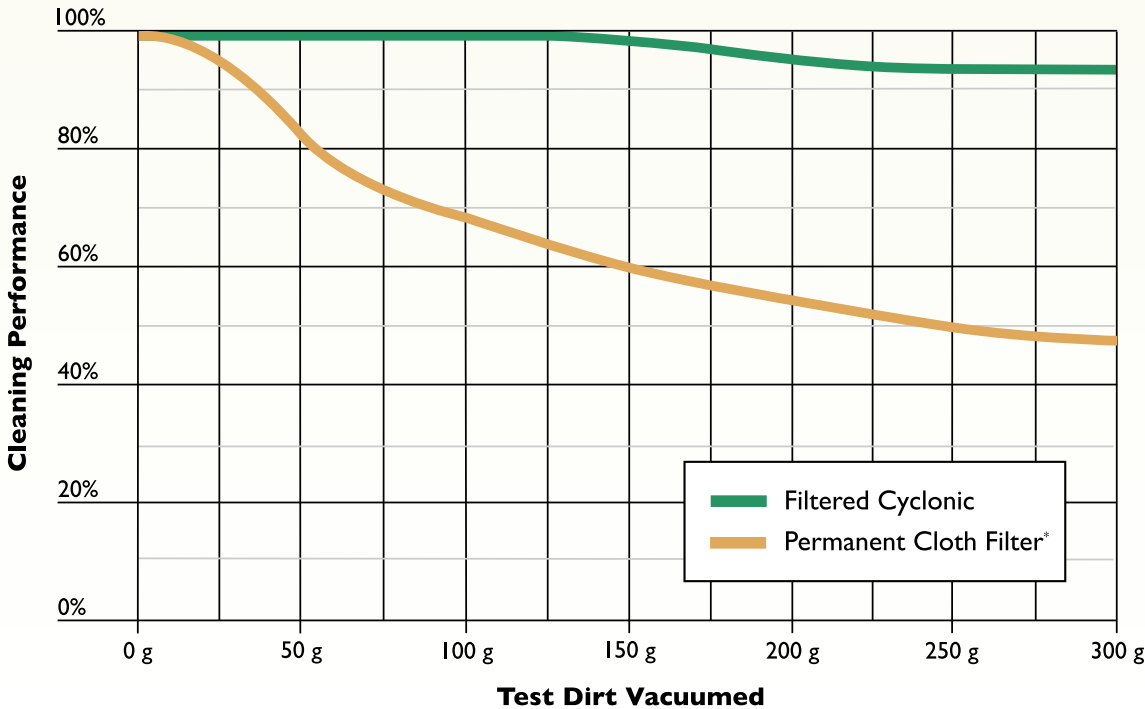

- Cyclonic Filtration Technology (CFT) provides maximum cleaning power.
- High-performance motor delivers powerful and reliable cleaning performance.
- On-board canister inlet valve provides cleaning convenience at power unit location.
- Comfort-grip ABS plastic dirt bucket maximizes handling and durability.
- Replaceable pleated filter optimizes system performance.

The CFT™ Difference

Sustained Cleaning Power Equals Powerful Vacuum Performance Every Time

Results from independent testing conducted by Intertek Testing Service, NA, Inc. in Cortland, NY.
*Includes GORE-TEX®, Teflon® or other treated fabrics

Using cyclonic separation, CFT removes 100% of vacuumed dirt from the living area.

Cyclonic Filtration Technology (CFT) is a dual filtration process that removes 100% of the vacuumed dirt from the living area. For primary filtration, CFT uses Cyclonic Separation, a process that removes 96-98% of the dirt from the air stream without the use of bags and filters.

The remaining fine dust particles (less than 5%) are trapped in the high-performance filter.

CFT means you have maximum airflow and vacuum power for sustained, deep, thorough cleaning performance, every time you vacuum.

Model	Recommended Home Size (sq. feet)	Sealed Vacuum (H ₂ O lift)	CFM Max	Max Air Watts*	Volts	Max/Avg. Amps**	Collection Capacity (gallons)	Level of Quietness (decibels)***
CV1800	up to 2,500	106"	115	422	120	11.2/9.9	4	73.7 dB _A
CV2200	up to 5,000	125"	121	520	120	14.0/11.3	6	64.2 dB _A
CV2600	up to 8,000	141"	124	575	120	15.7/12.4	6	62.8 dB _A
CV3200	up to 12,000	106"	221	848	240	12.8/10.2	6	67.8 dB _A

All power units use Cyclonic Filtration Technology®.

*ASTM recognizes air watts as air power and is defined as "above the floor cleaning potential."

**Maximum amps refer to the potential amount of current if the power unit is running in a stand-alone situation (no tubing or accessories attached).

Average amps refer to the actual amount of current used when the power unit is in typical operation (installed, with accessories attached).

***ASTM draft F11.50.07 test method was used to determine dB_A ratings. Sound levels were measured at 6' from the power unit. All power units were exhausted outdoors.
